

VICTORIA, BC - 17 January 2023 - OA Solutions is proud to announce the signing of a Partner Master Services Agreement with DualEnroll®.

For over 20 years, OA has assisted post-secondary institutions to analyze their business processes; recommend changes; and protect their investment of their Ellucian® Enterprise Resource Planning (ERP) systems.

OA has provided implementation, training, and consulting services to over 80 institutions across North America. Our consultants' superior knowledge of the Ellucian® applications in conjunction with their experience and understanding of business practices employed at post-secondary education institutions, enables OA to provide the services needed for institutions to gain maximum benefit from their investment in these systems and gain the efficiencies needed to ensure their services to students are second to none.

DualEnroll® powers college programs for high school students taking college-credit courses. These programs (variously called dual enrollment, concurrent enrollment, or dual credit) increase college completion and save families thousands of dollars. As one of the fastest-growing areas of college enrollment, dual enrollment is strategically important for institutions of higher education but has unique process requirements. DualEnroll® acts as a front-end to the college's core ERP system, automating and streamlining these unique processes then synchronizing student data with the ERP as the college system of record. Colleges adopting DualEnroll® typically see a double-digit increase in dual credit enrollments and significantly reduce the time required to administer these programs.

OA is delighted to have been chosen to support DualEnroll® integrations with the Ellucian® Enterprise Resource Planning (ERP) systems. This partnership will support colleges and universities with complementary software and services to ensure institutions achieve their missions.

About DualEnroll

DualEnroll® combines a state-of-the-art cloud architecture, intuitive user interfaces and a configurable workflow engine to enable college-specific processes in an efficient integrated platform. Nearly 50 colleges and universities including Ivy Tech Community College, the Community College System of New Hampshire, Missouri State University, Boise State University, the University of Connecticut, and the Virginia Community College System use DualEnroll® to streamline and automate their dual and concurrent enrollment programs. Visit DualEnroll® at www.dualenroll.com.
